

Please do NOT remove the established business relationship qualification from the fax regulations. Compliance will create an extreme hardship on our small association - an unmanageable administrative burden for which we do not have the human or financial resources. The simple act of asking to be a Member of our association should serve as prior consent. Again, please do not impose this unnecessary burden on our staff.

Sincerely,

Peter L. Schmelzer, CAE
Executive Director
American College of Osteopathic Family Physicians
